Attention Provider Type 28 (Pharmacy):

FDA Expands Eligibility for COVID-19 Vaccine Boosters

Effective November 19, 2021, the U.S. Food and Drug Administration (FDA) amended the emergency use authorizations (EUA) for both the Moderna and Pfizer-BioNTech COVID-19 vaccines authorizing use of a single booster dose for all individuals 18 years of age and older after completion of primary vaccination with any FDA-authorized or approved COVID-19 vaccine.

Beginning November 19, 2021, Nevada Medicaid will reimburse the administration fee for the booster dose of the Pfizer and Moderna COVID-19 vaccinations for all individuals 18 years of age and older for pharmacy point-of-sale (POS) claims. The booster dose is to be administered at least six months after the completion of the primary series.
